IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In Re Application of: Mark E. Pennell, et al.	Examiner: not yet known
Serial No.: 09/993,888	Art Unit: 2152
Filed: November 27, 2001	Atty. Docket No.: 10005.000110
Title: Method and Apparatus for Defeating a Mechanism that Blocks Windows	

Commissioner for Patents
Office Of Initial Patent Examinations
Customer Service Center
Washington, D.C. 20231

REQUEST FOR CORRECTED FILING RECEIPT

Sir:

Enclosed is a copy of the Official Filing Receipt
received from the U.S.P.T.O. for the above application.

The Filing Receipt contains the following error(s):

1. The 2nd Inventor is erroneously stated as Scott L.
Primak. The correct Inventor's name is, L. Scott Primak as
indicated on page 1 of the filed specification (a copy of
which is enclosed and marked as EXHIBIT A).

Please issue a corrected Filing Receipt rectifying the
above error(s). The requested corrections are indicated in
red ink in the enclosed copy of the Filing Receipt.

Favorable action is respectfully solicited.

Dated: 12-26-01Respectfully submitted,
Mark E. Pennell, et al.By: Patrick D. Benedicto

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Non-Publication Request: No

Early Publication Request: No

**** SMALL ENTITY ****

Title

Method and apparatus for defeating a mechanism that blocks windows

Preliminary Class

709

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

METHOD AND APPARATUS FOR DEFEATING A MECHANISM THAT BLOCKS WINDOWS

Inventors: Mark E. Pennell, L. Scott Primak, and Charles Gilbert

5

BACKGROUND OF THE INVENTION

1. Field Of The Invention

This invention relates generally to computer systems, and more particularly to detection and processing of windows.

10 2. Description Of The Background Art

A computer network couples various remotely located computers together to allow them to exchange information. On the Internet, for example, a user with a personal computer and a web browser can access a remotely located web server computer. The web server computer serves (i.e., delivers) content to a window in the
15 personal computer. The web server computer may include web pages containing information that is of interest to the user. The web server computer may also include downloadable computer programs.

A typical commercially-operated web server on the Internet includes some form of advertising. The advertising may be for goods or services. The advertising may also
20 be non-product related (e.g., "vote for John Doe"). Regardless of their message, these advertisements provide revenue to the web server operator. Thus, not satisfied with just having advertisements on a web page, operators have come up with various ways
